PROFESSIONAL SUMMARY

Versatile software engineer with a proven track record in developing innovative, scalable solutions across diverse platforms. Proficient in Java, Gosu, SQL, C/C++, and modern frameworks, I excel at transforming complex challenges into efficient, reliable outcomes. Adept in agile environments, I leverage strong problem-solving, leadership, and communication skills to drive technology excellence and deliver impactful results.

WORK HISTORY

Software Developer Intern | 01/2024 to Current

The Mutual Group - West Des Moines, IA

- Demonstrated versatility and adaptability by utilizing Gosu, SQL, and Java to develop and maintain software applications, effectively learning and applying diverse technologies.
- Exhibited exceptional productivity and commitment by consistently completing 125% of the expected workload for each sprint, ensuring adherence to project timelines.
- Gained in-depth expertise in Guidewire's Policy Center, contributing to the development and customization of insurance software solutions through creative problem-solving and adaptability.
- Fostered a collaborative and positive team environment by effectively communicating and sharing knowledge with team members, contributing to collective success.
- Leveraged version control and project management tools such as Bitbucket, SourceTree, Git, and Jira to enhance team collaboration, organization, and efficient knowledge sharing.

EDUCATION

Iowa State University - Ames, Iowa | Bachelor of Science

Software Engineering, Expected in 05/2025

- GPA: 3.45
- Relevant Coursework: Software Development Practices, Object-Oriented Programming, Data Structures, Algorithm Design and Analysis, Construction of User Interfaces, Database Management, Software Testing, Machine Learning, Embedded Systems, Cloud Computing (AWS), Network Protocols and Security, Software Project Management, Operating Systems

SKILLS

- **Programming Languages:** Proficient in JavaScript, Python, Java, C#, C++, C, and Gosu.
- **Database Management:** Skilled in SQL, NoSQL databases, MongoDB, and Microsoft SQL Server Management Studio.
- **Problem-Solving:** Ability to analyze complex issues and develop effective solutions.
- **Teamwork and Collaboration:** Proven experience working well within a team environment.
